

Deadlines

Arkavo Hait, Sagnik Bhattacharya, Aman Deep Singh

May 29, 2016

Creating a sample GUI

Should be finished by next week.

Converting the code to CUDA

Time needed, seriously can't figure out how much

Debugging

Will be started after initial code is written. Some debugging has been done on the skeleton code. We will check the data obtained from the sequential code already written (seq.c) and see whether the data makes sense. We have done some rudimentary error checking already.

Other Work

1. We need to modify the File I/O to ensure that we print the planetArray data to a file in a form that would make it easier for us to take data from during simulation.
